Storage & Handling

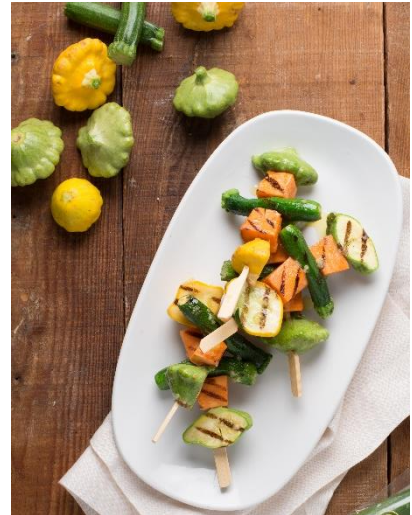

Warehouse temperature: 42°F

Humidity: 90-95%

Allow for good airflow

Southern Selects baby squashes are grown from select varieties that are gently harvested by hand before reaching full maturity. Our select collection includes baby green patty pan, baby sunburst squash and baby green zucchini. Each squash has a unique shape and color, but all are equivalent in delicious flavor.

Our baby squashes bring an exciting, colorful addition to your plate, and versatility to your cooking! They are great for entertaining at home, and ideal for caterers and banquet functions. Enjoy them grilled, roasted, steamed or sautéed. They are also an excellent source of Vitamins A and C, and a good source of folate.
