# Asparagus Tips

## Availability

Year-round

## Storage & Handling

34-36 °F (0-2 °C) cooler

90 to 95% (out of box)

Do not mist

Asparagus is sensitive to ethylene but is not an ethylene producer.

Southern Selects asparagus is a delicious, healthy, and easy to prepare vegetable that is perfect for today's millennial shopper. Our asparagus tips are hand cut to bring you the sweetest, most tender part of the spear. Chefs also enjoy versatility of this trendy product. It's difficult to find a restaurant menu today that doesn't have at least one asparagus offering.

Asparagus is a perennial plant, which is harvested one to two years after the seeds are sown. Once it is ready to harvest, the asparagus shoots are cut above the ground. The field will yield product for up to twelve years with proper management.
