

Let's grow something special.

Southern Selects French Beans

Availability

Year-round

Storage & Handling

Warehouse Temperature:
34 °F

Ethylene sensitive

Southern Selects French beans allow you to get your gourmet on! Chefs love these slender green beans for their tender flavor and beautiful appearance. Also known as Haricot Vert, Southern Selects French beans are hand-selected and trimmed just for you. They have a smooth, velvety flesh with no strings, tons of nutrients, and a microwave cooking option for the time-crunched moments in your life.

They grow to lengths of 4 to 5 inches with a color ranging from light to dark green depending on variety. Guatemala is among the largest producers of French Beans in the world. Here, each bean is picked by hand, pre-trimmed and packed in neat rows for your convenience.
