

Let's grow something special.

Southern Selects
Starfruit

Availability

Year-round

Storage & Handling

Warehouse temperature:

34-36 °F

Humidity: 95-100%

Do not mist

The carambola, or starfruit, is one of the most distinctive fruits available. This juicy fruit has a mildly sweet and tart flavor. Long ribs run from the top to bottom of the fruit. When sliced across the diameter, a star pattern is revealed. The unique star shape makes this fruit a wonderful garnish and an excellent addition to fruit salads.

Our Southern Selects, Florida-grown starfruit has a beautiful yellow skin that keeps and ships well. Grill the slices to create an exciting addition to hot dishes or add to fruit kabobs. They are highly nutritious, an excellent source of Vitamin C and good source of fiber.
