

Let's grow something special.

# Southern Selects Sugar Snap Peas

The Sugar Snap Pea combines the best qualities of both the English pea and the snow pea. Plump peas are enveloped within a crisp, tender, edible pod. This award-winning vegetable was developed less than 40 years ago.

The sugar snap is sweeter than the snow pea and is best eaten raw or cooked very lightly. The sugar snap is one of the fastest growing vegetables, in popularity, in the market place. Their excellent eye appeal, good shelf life, and great flavor all contribute to the sugar snap's rising popularity.

Southern Specialties sugar snap peas are a great addition to the family's kitchen, especially during the summer. This simple snack is low in calories, packed with nutrients, and has a sweet taste that children love!
